

A 2 m. wide paved recreational pathway runs the length of the West London Dyke. It is frequently used by joggers, walkers and cyclists.

# LEGEND

- Dyke Location/Priority**
- Dyke Location as Provided by UTRCA 2004 Inspection\*
  - Degraded
  - Critical
  - Threshold
  - Other - (Existing Plans for Reconstruction Address Risks)
- See Table 1 on p. 5 for definitions of priority levels.

- Vegetation Community\*\***
- Anthropogenic
  - Floodplain

- Land Parcel Ownership**
- Private
  - City of London
  - UTRCA

NOTES:  
 1. Air Photo provided by UTRCA.  
 \*2. Dyke locations provided by the 2004 Inspection for the UTRCA.  
 \*\*3. Vegetation features were assigned following the ELC protocol: Ecological Land Classification for Southern Ontario methodology (Lee, H.T., W.D. Bakowsky, J. Riley, J. Bowles, M. Puddister, P.Uihig, and S. McMurray. 1998. Ecological Land Classification for Southern Ontario: First Approximation and its Application. Ontario Ministry of Natural Resources, Southcentral Science Section, Science Development and Transfer Branch. SCSS Field Guide FG-02).  
 Vegetation communities have been designated at the Community Series Level, the lowest level in the ELC that can be identified without a site visit (ELC Field Guide, 1998, pg. 18). A site visit and vegetation species inventory was conducted. A vascular plant list for species identified during the site visit is presented in Appendix 1. An Anthropogenic community type has been introduced to account for residential, commercial, industrial and public open spaces that are maintained in an ornamental setting.
