Upper Thames River Conservation Authority

Upper Thames River Conservation Authority Board of Directors' Meeting Agenda
Tuesday August 23, 2022 at 9:30 A.M
Virtual Meeting due to COVID-19 Pandemic

- 1. Territorial Acknowledgement
- 2. Modifications to the Agenda
- 3. Declarations of Pecuniary Interest
- 4. Presentations/Delegations
- 5. Administrative Business
- 5.1. Approval of Minutes of Previous Meeting: Tuesday June 22, 2022

Mover: A.Murray Seconder: B.Petrie

THAT that the Upper Thames River Conservation Authority Board of Directors approve the Board of Directors' minutes dated June 22, 2022, including any closed session minutes, as posted on the Upper Thames River Conservation Authority web-site.

- 5.2. Business Arising from Minutes
- 5.3. Correspondence

6. Reports – For Consideration

6.1. UTRCA COVID-19 Interim Vaccination Policy – Update

J.Howley - HR #29668

Notice of Motion given on June 20, 2022:

Mover: T.Jackson Seconder: P.Mitchell

TO suspend the vaccine mandate for staff and new hires effective immediately.

6.2. 2022 Mid-Year Financial Report and Budget Revisions

C.Saracino and T.Annett – Finance #1305

Mover: J.Reffle Seconder: J.Salter

THAT the Board of Directors approve the recommendation as presented in the

report.

6.3. Review of Mileage Rates

T.Annett – Admin #4573 Mover: M.Schadenberg Seconder: A.Westman

THAT the Board of Directors approve the recommendations as presented in the

report.

7. Reports - For Information

7.1. Administration and Enforcement – Section 28 Status Report

J.Allain – ENVP #12260

Mover: M.Blosh Seconder: A.Hopkins

THAT the Board of Directors receive the report for information.

7.2. Celebrating Natural Connections Project

T.Hollingsworth – #125638

Mover: T.Jackson Seconder: S.Levin

THAT the Board of Directors receive the report for information.

7.3 General Manager of Conservation Ontario – Announcement

Mover: M.Lupton Seconder: N.Manning

THAT the Board of Directors receive the report for information.

7.4 August For Your Information Report

Mover: H.McDermid Seconder: P.Mitchell

THAT the Board of Directors receive the report for information.

8. Notices of Motion

9. Chair's Comments

10. Member's Comments

11. General Manager's Comments

12. Reports – In Camera

Mover: B.Petrie Seconder: A.Murray

THAT the Board of Directors adjourn to Closed Session – In Camera, in

accordance with Section C.13 of the UTRCA Administrative By-Law, to discuss

litigation affecting the Authority.

12.1. Litigation Affecting the Authority – Updates on On-Going Cases

Moved by: J.Salter Seconded by: J.Reffle

THAT the Board of Directors Rise and Report progress.

Mover: A.Westman

Seconder: M.Schadenberg

THAT the Board of Directors receive the report for information.

13. Adjournment

Agenda #: 6.1

Subject: UTRCA COVID-19 Interim Vaccination Policy - Update

Motion Regarding Vaccination Policy

Mover: T.Jackson Seconder: P.Mitchell

TO suspend the vaccine mandate for staff and new hires effective immediately.

Staff Recommendation:

That the following staff report be provided as information in response to the notice of motion to suspend the vaccination policy.

On October 26, 2021, Board of Directors approved the UTRCA COVID-19 Interim Vaccination Policy. The Occupational Health and Safety Act fosters an internal responsibility system, which means all workplace parties have a duty to keep the workplace safe. This duty includes taking every reasonable precaution in the circumstances to protect the worker (OHSA, Section 25(2)(h).

Throughout the pandemic, the UTRCA has been consistent in adhering to the provincial acts and regulations associated with the pandemic and relying on direction from local public health officials. In March 2022, when the Province began revoking acts and regulations, the UTRCA continued to follow the guidance from our local health units. While some staff, including field staff, reported to the workplace in preparation of the upcoming season, others that were able to continue to work remotely opted to do so. Masking and active screening requirements continued to be in place for all UTRCA workplaces as did occupancy limits on meeting rooms and the lunch room.

On July 4, 2022, the Watershed Conservation Centre reopened and the UTRCA became "mask friendly," giving employees and visitors the option to wear a mask if they chose to do so. The daily active screening requirement was lifted and employees were asked to passively screen themselves prior to attending the workplace, with the key message being, "if you are sick stay home." Occupancy limits for meeting rooms and lunch rooms were also lifted. Staff updates were provided in advance and signs reflecting these changes were posted throughout the workplaces. Finally, employees that had been working remotely were encouraged to return to the workplace.

Currently, the UTRCA COVID-19 Interim Vaccination Policy remains in place. Although the Province has suspended the QR Scanner Service, new staff continue to provide visual proof of vaccination as part of onboarding. Local health units continue to promote vaccination as the strongest defense against COVID-19 and influenza, and Southwest Public Health literature pertaining to workplaces encourages maintaining vaccination policies as a protective strategy to safeguard workplace health and safety. In addition, health units suggest workplaces encourage their staff to stay up to date with COVID-19 booster doses, including fourth doses.

On July 11, 2022, the Joint Health and Safety Committee discussed the COVID-19 Interim Vaccination Policy as part of its regular COVID-19 discussion. Committee members agreed that the vaccination policy should remain in place as per the information shared by the local health units. Although other safety measures are being lifted, the vaccination policy demonstrates that the UTRCA is taking every reasonable precaution to ensure the health and safety of staff. The committee will revisit the policy again at its next meeting, which is scheduled for September, to ensure the policy is still relevant based on updated health unit messaging.

A poll of other conservation authorities that was recently completed found that many still have their vaccination policy in place, including CAs with larger numbers of employees, such as Halton, Hamilton, Niagara Peninsula, Otonabee, and Ganaraska Region CAs. Kettle Creek and Nottawasaga Valley CAs, which both have smaller staffing complements, have revoked their policy.

Although COVID-19 numbers reported by the Ontario Science Table appear to be low at this time, the <u>wastewater signals in the Southwest</u> are climbing. Last year, transmission was reduced in the summer months but increased in the fall with the return to indoor activities and school. It remains to be seen whether a similar trend occurs this year.

Through discussion with our solicitor, his consultation with others has indicated that larger companies continue to implement vaccine policies to reduce their risk and will be re-evaluating policies in February. The UTRCA has had very limited issues with compliance and our multi-layered approach to protect staff has resulted in no workplace transmissions of COVID-19.

At this time, suspending the vaccine policy is premature. Staff will continue to monitor COVID-19 transmission in the watershed public health regions, and receive input from the UTRCA Joint Health and Safety Committee to determine when suspension of the policy is appropriate.

and Accounting

Date: 15 August 2022 Filename: Finance #1305

Agenda #: 6.2

Subject: 2022 Mid-year Finance Report and Budget Revisions for Approval

Recommendation

That the UTRCA Board of Directors approves revisions to the 2022 Budget as presented: projected operating deficit of \$115,626 and projected capital spending deficit of \$127,851.

Financial Results to Date

The statement of Financial Position and Accumulated Surplus (Balance Sheet) at the end of July 2022 reflects net financial assets 25% higher than at the same time last year. "Net financial assets" is the difference between what we have or is owed to us, and what we owe to others, our liabilities.

Our financial assets have increased this year, by comparison to last year, even while the total of liabilities overall is similar. There has been a large change in the deferred committed funding balance between 2021 and today. Recall that deferred committed funding is the amount of revenue we've received from levy, from the province and the federal government for flood control capital projects. We continue to set aside, or defer, that revenue to match the cost of those major repair projects which provide benefit in the future. That future cost is depreciation expense. The cash and investments we hold also reflect part of our reserves.

Year End	Cash and	Deferred	Reserves	Percentage of Cash to
	investments	Revenue		Deferrals and Reserves
2016	7,404,522	1,918,841	6,647,628	86%
2017	9,437,724	3,717,279	7,181,187	87%
2018	8,842,383	8,181,175	6,443,858	60%
2019	9,179,588	6,397,439	6,843,986	69%
2020	12,012,946	6,560,738	7,160,362	88%
2021	15,024,110	8,623,249	7,539,873	93%

While a 100% target is ideal, it is not expected because not all reserves would be consumed simultaneously and therefore 100% of their value need not necessarily be held in cash or investments.

The 2022 YTD actual figures on the Comparative Operating Statement indicate that the bulk of our annual revenues have now been recorded for the year (\$16M of \$17.7M), but only 54% of our expenses have yet been made at the 58% mark of the year. This spending percentage is identical to last year, however last year's difference was predominantly still due to the effects of Covid, and this year, our compensation change did not take effect until mid-July.

Our financial results to date compare very favourably to past results and our original plans.

Budget Revisions

During 2022 thus far 10% of permanent staff have left or retired and many, many more subsequent staffing changes have occurred. Not all vacant positions have yet been filled. Our budgeted FTE has dropped from 140.29 in the original budget to 133.69 FTE in the revised budget. We have fully incorporated the expected costs of wages due to the compensation review, and we have re-estimated both revenues and expenses to include new contract opportunities awarded since January.

Forecasts for revenues have been revised to include:

- Some levy funding deferred to 2023
- The appropriate part of a multi-year \$238,700 grant for the Commemorate Canada grant from Canadian Heritage
- The appropriate part of a multi-year \$182,300 grant for a Ontario Land Trust Alliance grant for wetlands conservation
- The \$84,000 bonus WSIB rebate we received

An important item to note with regard to budgeted revenues in 2022 is that we have left in the annual transfer payment amount from MNRF of \$181K even though we have not yet heard of any 2022 agreement forthcoming from the province.

Forecasts for expenses were edited to accommodate:

- The full change in wage grid due to the compensation review implementation for the remainder of 2022
- Unbudgeted insurance liability costs (\$8,000)
- Purchase of AV equipment for the hybrid meeting rooms (\$35,000)
- Purchase of Questica budget software (\$26,000)
- Costs associated with the two grants noted above

Another important note in the capital spending budget is the value of vehicles approved for purchase in 2022. A delivery date for none of these vehicles is yet anticipated due to supply chain issues but they remain in the revision as required purchases.

The bottom line change to the forecast for 2022 is not large given the sizes of the two budgets, however, there has been a great deal of refinement occurring in each of the Mission Centres. The projected operating deficit approved in February is now forecast to be slightly smaller while a slightly larger deficit in capital spending is expected if vehicles are actually delivered. For this reason we recommend approval of the revisions to our approved 2022 budgets to reflect understanding of the many changes which are incorporated here.

To: UTRCA Board of Directors

From: Tracy Annett, General Manager

Date: August 15, 2022 Filename: Admin # 4573

Agenda #: 6.3

Subject: Review of Mileage Rate

Recommendation

THAT the Upper Thames River Conservation Authority increase the mileage rate of reimbursement to staff and board members for approved business use of personal vehicles from \$0.50 to \$0.61 effective for travel after September 3, 2022.

Further THAT the rates for mileage, per diems and honorariums be reviewed annually in preparation of the budget.

Background

The Canada Revenue Agency (CRA) sets a reasonable rate for mileage for use of personal vehicles. At this time, our mileage rate is low and close to what CRA may deem an "unreasonable rate" which would mean that it could become a taxable benefit. It has been several years since the UTRCA mileage rate was updated. A survey of mileage rates was conducted with the following results:

- Provincial mileage rate is \$0.61
- Conservation Authorities' have an average rate of \$0.56 with the most common rate of \$0.61
- Counties of Oxford, Middlesex, Huron, Elgin mileage rate is \$0.61
- Municipalities of Middlesex Centre, Township of East Zorra-Tavistock, Town of St. Marys the rate is \$0.61

Watershed municipalities not listed above have mileage rates in the range of \$0.55 - \$0.59.

The financial impact of implementing the mileage rate is limited, as staff travel in personal vehicles has not returned to pre-pandemic levels.

Summary

Staff recommends that the mileage rate be increased for staff and members that the Per Diem, Honorarium and Mileage Rates be reviewed annually in preparation of the budget.

Recommended by: Tracy Annett, General Manager

Prepared by: Sharon Viglianti, Human Resources/Payroll Administrator

MEMO

Subject: Celebrating Natural Connections Project

Recommendation

That the report be received for information.

Background

With the support of watershed municipalities and community organizations, the UTRCA was successful in obtaining funding support from the Canadian Heritage Celebration and Commemoration Program Reopening Fund. The UTRCA's project, entitled "Celebrating Natural Connections," is designed to celebrate and commemorate the local natural spaces that became so important for physical and mental health during the pandemic.

Celebrating Natural Connections features a series of events across the Upper Thames watershed, designed to provide residents with an opportunity to explore local natural spaces with experienced environmental education staff and community groups and organizations. Each event will include hikes, displays, and presentations, with the participation of local artists, municipalities, hiking, naturalist, and anglers clubs, wherever possible. At some events, attendees will participate in the installation of a permanent item such as a bench or picnic table, to commemorate the contributions of local front line workers.

Emphasis for participation will be on community members that have been instrumental in helping others through the pandemic: front line workers and local health unit staff. In addition, new Canadians, people living with disabilities, and youth groups such as Girl Guides and Scouts will be targeted to encourage participation.

The project also includes the production of two virtual hikes, one being offered in French.

The proposal was to have seen these events presented over the course of a year but timelines have been compressed and the project must be completed by March 31, 2023.

Staff are working with community partners to organize each individual event. The table below outlines the events planned to date. Each event will run from 10 am to 2 pm.

Date	Location
August 27	Burgess Park, City of Woodstock
September 24	Wildwood Conservation Area
September 25	Dorchester Mill Pond
October 15	Hodges Pond, Oxford County
October 22	Lions Park, Mitchell
October 29	TJ Dolan Natural Area, Stratford
November 5	Fanshawe Conservation Area
Date TBD (January 21, 28, or March 4)	Wildwood Conservation Area
February 20 (Family Day)	Pittock and Fanshawe Conservation Areas
Virtual Hikes	2 (1 in English and 1 in French)

Most events will include greetings and a formal thank you to frontline workers. Member municipal councils and the UTRCA Board members will be approached to help with these remarks.

The project has involved many municipalities and organizations, to varying degrees. Participation ranges from offering letters of support, to providing activities and volunteering at events. Partners that have come forward include:

 City of London, City of Stratford, City of Woodstock, Municipality of Thames Centre, Municipality of West Perth, Bird Friendly London, Cross Cultural Learning Centre, Crunican Orchards, Heeman's, London Arts Council, London Heritage Council, Mill Pond Committee, Mitchell Lions Club, Oxford Coalition for Social Justice, Oxford EarlyON, Patsy Ann Day (Indigenous educator), Stratford Field Naturalists, Southwestern Public Health, Tourism Oxford, Wildlife Gardening, Woodstock Environmental Advisory Committee, Woodstock Field Naturalists, Woodstock Public Library, 5th London Girl Guides,5th London Pathfinders.

Pending partnerships include:

 Carolinian Canada, Friends of Medway Creek, Future Oxford, Jenn Mezzei (local artist), London Environmental Network, London Public Library, Nature London, Museum of Ontario Archaeology, St. Marys Library, St. Marys Scouts, Thames Talbot Land Trust, Thames Valley District School Board, UWO Environmental Science Association, West Perth Public Library, Woodstock Art Gallery. Details on this project and the events will be provided on the <u>www.thamesriverevents.ca</u> website.

Media Release

FOR IMMEDIATE RELEASE

Conservation Ontario Announces New General Manager

Newmarket, Ontario (August 15, 2022) Conservation Ontario's Board of Directors is pleased to announce the appointment of Angela Coleman as the new General Manager, effective September 19, 2022.

"We're very pleased to have Angela join us as the General Manager here at Conservation Ontario," said Alan Revill, Chair of Conservation Ontario's Board of Directors. "Angela brings enthusiasm, creativity, and a wide range of experience to the position of General Manager. She's demonstrated effective and dynamic leadership skills in her previous position and we are confident that she will lead us towards a bright future."

Ms. Coleman comes to Conservation Ontario from the South Nation Conservation Authority in Finch, Ontario where she is the Chief Administrative Officer.

When she initially joined the South Nation Conservation Authority in 2002, Ms. Coleman held various roles ranging from Communications Coordinator to Project Manager. After a brief hiatus working for a Law Firm, in 2011 she rejoined the South Nation Conservation Authority, initially as the Director of Planning and Approvals and most recently as the Chief Administrative Officer.

Ms. Coleman graduated from the Faculty of Law at the University of Ottawa in 2009 and was admitted to the Bar of the Province of Ontario in 2010. She teaches the Municipal Law Program for the Association of Municipal Clerks and Treasurers in Ontario and speaks on a variety of municipal, property, and governance topics to a wide range of audiences.

Ms. Coleman has also been a director and volunteer with many community groups and associations.

Outside of work, Ms. Coleman currently owns and operates Sand Road Maple Farm in Moose Creek Ontario, with her husband, Scott Coleman.

Conservation Ontario's outgoing General Manager, Kim Gavine, retired on June 30, earlier this year. Since then, Bonnie Fox, Director of Planning and Policy, has been acting as GM.

We're Celebrating Natural Connections!

With the support of municipalities and community organizations, the UTRCA has obtained funding support from the Canadian Heritage Celebration and Commemoration Program Reopening Fund. The funds are being used to host a series of free "Celebrating Natural Connections" public events in natural spaces across the Upper Thames River watershed.

The events include 10 public hikes and two virtual hikes, with activities, displays, and presentations. They are an opportunity to explore the natural spaces that became so

important for our communities' physical and mental health during the pandemic. Local artists and municipalities are involved, as well as hiking, naturalist, and angler clubs.

The UTRCA would especially like to invite all those community members that have been instrumental in helping others through the pandemic. A commemorative item will be installed at many of the event locations to recognize the contributions of local front line workers.

The event dates and locations include:

- Saturday, August 27 at Burgess Park, Woodstock
- Saturday, September 24 at Wildwood Conservation Area
- Sunday, September 25 at Dorchester Mill Pond
- Saturday, October 15 at Hodges Pond, Sweaburg
- Saturday, October 22 at Lion's Park, Mitchell
- Saturday, October 29 at TJ Dolan Natural Area, Stratford
- Monday, February 20, at Fanshawe and Pittock Conservation Areas

Plans are also underway for a winter event at Wildwood Conservation Area and two virtual hikes.

This project is funded in part by the Government of Canada. For more information about Celebrating Natural Connections, please visit www.thamesriverevents.ca. Contact: Linda Smith, Community Partnerships Specialist

Update: Community Precipitation Monitoring Project

Thanks to a grant from the TD Friends of the Environment Foundation, 15 additional rain gauges were added to the UTRCA's Community Precipitation Monitoring Project network in 2022. Staff have now installed 27 rain gauges across the watershed in the first two years of this project.

Community Precipitation Monitoring Project participants enjoyed a tour of Wildwood Dam in July.

Participants in the project measure and record daily precipitation using the manual rain gauge provided and submit their observations to the Community Collaborative Rain, Hail and Snow Network (CoCoRaHS) platform. Their precipitation data / observations are automatically and continuously downloaded from the CoCoRaHS database into the UTRCA's local flood forecasting and monitoring database to enhance our understanding of the total rainfall received and its spatial distribution.

As part of the project, the UTRCA is providing several educational sessions each year for project participants. On July 12, participants were invited to a lunch and learn at Wildwood Conservation Area. UTRCA staff Laura Flynn and Mark Helsten provided an overview of the flood forecasting program and an overview of how the data is being used. Participants were then taken on a tour of Wildwood Dam and treated to an appreciation lunch for all their data collection efforts.

The Community Precipitation Monitoring Project is a part of a larger Community Science initiative launched by the UTRCA in 2021. Community science engages members of the public in collecting data that can be used to increase scientific knowledge and inform decision making.

Looking back: Spring Tree Planting

Despite two late snowstorms and several rainy days, the UTRCA's spring tree planting crew persevered and planted approximately 25,000 trees on 50 private rural properties. In addition to our crew's efforts. 80 landowners

Brenda Gallagher managed the hand planting crew. In this photo, they are establishing a buffer for wind erosion control and to shelter farm buildings, reducing heating and cooling costs as well as odour concerns. planted another 13,000 trees on their own to improve the health of their land.

Planting projects included windbreaks, retiring highly erodible land, and treed buffer strips along watercourses. The Conservation Authority was able to help most of the property owners receive grants to help reduce their costs.

Over the last couple of years, the tree planting program has had challenges due to the pandemic. During this time, we were very fortunate to have small but enthusiastic crews who ensured the trees were put into the ground. This year was no exception, and the

Jay Ebel managed the machine planting crew, planting thousands of seedlings across the watershed. On most properties, Jay will also provide pre- and post-planting tending to help ensure the long-term success of the trees. These projects generally involve the retirement of sensitive lands or field windbreaks.

planters were excited about the experience they gained while working at the UTRCA. The crew enjoyed being able to connect with nature while they were doing their job. One crew member said, "I felt I was helping to offset the effects of climate change and making a difference to the environment for future generations to appreciate."

In September, UTRCA forestry staff will start site visits to begin lining up sites for the spring of 2023 tree planting season. We look forward to connecting with new landowners as well as continuing to work with those from the past. Contact: Brenda Gallagher, Forestry Technician

On the Board Agenda

The next Board of Directors meeting will be held virtually on August 23, 2022. Please visit the "Board Agendas and Minutes" page at www.thamesriver.on.ca for agendas, reports, audio/video links and recordings, and approved minutes.
