

Upper Thames River Conservation Authority

**Class Environmental Assessment
Harrington Dam**

Public Information Centre – Comment Form

The Environmental Assessment for the Harrington Dam, in the Harrington Conservation Area, is intended to address safety concerns identified as part of the Dam Safety Assessment (ACRES, 2007) including insufficient spillway capacity, spillway instability and embankment stability. Through the study, potential alternatives will be evaluated to determine a course of action to mitigate dam safety concerns.

The project is being carried out in accordance with the requirements of the *Conservation Ontario Class Environmental Assessment*. The study is being undertaken by the Upper Thames River Conservation Authority (UTRCA) in partnership with the Township of Zorra.

Public consultation is a key component of this study. This Public Information Centre (PIC) is held to receive public input on the possible future alternatives for the Harrington Dam. Any feedback and comments provided will become part of the public record for this project.

Please provide your comments regarding the preferred alternative below.
