

Thank You, Rotary Club of London West!

Thank you to the Rotary Club of London West for being such a great friend to Westminster Ponds/Pond Mills Environmentally Significant Area. Since 2000, the club has helped protect and raise awareness about this important natural area by:

- Building boardwalks
- Installing information kiosks and benches
- Hosting walks
- Building a floating platform on Spettigues Pond

The Rotary Club of London West was dissolved in 2014, but their work continues through a legacy fund to plant native trees and shrubs over the next five years. This location is the first of those planting sites.
