

NOTICE OF PUBLIC INFORMATION CENTRE #3

WEST LONDON DYKE MASTER REPAIR PLAN

The West London Dyke is 2,374 m long and runs along the west bank of the North Branch of the Thames River from Oxford Street to the forks of the Thames River and then along the west bank of the Main Branch to the west side of the Wharnccliffe Road Bridge. The City of London owns the dyke and through an agreement, the Upper Thames River Conservation Authority (UTRCA) undertakes major maintenance activities.

The UTRCA retained Stantec Consulting Ltd. in 2009 to complete a Master Repair Plan covering the next 20-year period to address aging infrastructure, flood protection, public use, and integration of other City initiatives. The study was placed on hold in early 2013 pending updates to flood elevation information. With new information now available, Stantec is in the process of completing the Master Repair Plan.

This study is being conducted as a Master Plan (Phases 1 and 2) under the Municipal Class Environmental Assessment process (Municipal Engineer's Association, as amended in June 2007 and 2011). Under this process, First Nations, agency and public input is invited for incorporation into the planning and design for this study. The third and final Public Information Centre will be held on:

Date: Thursday, September 10, 2015
Time: 4:30pm to 6:30pm (open house format)
Location: Kiwanis Community Centre, 78 Riverside Drive, London ON

The presentation material will be available for viewing on the City's website at:
<http://www.london.ca/residents/Environment/EAs/Pages/West-London-Dyke-Master-Repair-Plan.aspx>
and on the UTRCA's website at <http://thamesriver.on.ca/water-management/london-dyke-system> after the PIC. If you have any questions, comments or concerns, please contact:
